80% of children with mental health disorders go untreated every year

The United States Surgeon General estimates that four-million U.S. children suffer from a severe mental health disorder that impairs their functioning at home, at school, and with peers. Half of all mental health disorders begin by age 14, however, only 20% of children with mental health disorders are diagnosed and treated each year. The Clinic is dedicated to identifying and treating children suffering from mental health disorders, eliminating negative stigmas associated with mental health treatment, and improving the lives of children and families in our communities.

"The staff at the Child Guidance Clinic are always there for me and my family"
-Caregiver

The Henrietta Weill Memorial Child Guidance Clinic provides mental health and substance abuse services and the resources necessary to promote wellness and recovery for Kern County children, adults, and families.

Who Are We?

The Henrietta Weill Memorial Child Guidance Clinic is a private, non-profit, outpatient mental health center for children and families. Since 1946, the Clinic has provided individual, family, and group counseling services for children, adolescents, and families who reside in Kern County, California.

Who Do We Serve?

The Clinic serves families with a wide range of issues. Typically, children and adolescents are referred to the Clinic because of difficulties that interfere with their functioning at home, in school or in the community. Problems may be related to control, attention, mood, anger management, etc. The Clinic also serves children and adolescents who have experienced various forms of abuse, neglect or other hardships that affect their daily lives.

How Can We Help?

Several options exist for treating emotional and behavioral issues. Children and families seen at the Clinic receive an initial assessment at which time an individualized treatment plan is developed by the parent(s) and therapist. Treatment may include parent education groups and/or individual, family or group counseling. A psychiatrist is available to provide medication support services, as needed. All of these services are provided in a bilingual, culturally appropriate environment.

SERVICES DESIGNED FOR YOU

All of our services and treatments are individualized for you and your family. We provide convenient locations and office hours, a 24-hour support hot-line, and single points of service – so traveling to multiple locations to find the treatment you need is not necessary.
